## How Do You Use Your iPad? Take Our Survey!

[Bobby Nguyen](#) & [Barbara S. Chaparro](#)

The newly released Apple iPad™ is a mobile device that can be used for many tasks including Web browsing, checking email, social networking, reading e-books, listening to music, watching movies, or playing games. Advocates of the iPad say that it is a replacement for the laptop computer and represents a "new age" of computing while critics say it is just "a really big iPhone". Only time will tell how this device will be used on a daily basis in the workplace and elsewhere.

We are curious how you are using your iPad device. Please take a moment to complete our [online survey](#). Results from this survey will be published in the next issue of Usability News.
